SPREADING RATE

1 COAT

On previously painted surfaces to get the one coat hiding up to 100sqft per liter/ per coat

2 COATS

On new surfaces up to 100 sq.ft per liter by two coats

PREPARATION REQUIRED

Surface must be clean, dry and free from efflorescent salts. After priming with Master Water based Primer, fill and smooth the surface with Master Wall Putty.

Remove all defective or poorly adhering material by rubbing down using a suitable abrasive paper and dust off. Spot prime and fill surface as described.

Make good minor defects. For large holes and cracks use sand and cement mixture. Allow to dry. Prime surface and then fill any surface imperfection with the filler described above. Allow to dry. Scuff surface using abrasive paper and dust off.
