LOW

AVAILABLE PACKS

4 Litre kit contains 3 Litre Epoxy with 1 Litre Hardener

PREPARATION REQUIRED

Clean the surface. Washing to remove contaminants, oil, grease e.t.c. Acid Etching or Removal of Laityance. Remove dust by vacuum cleaning; ensure no loose material left. Wash away oil, grease and releasing agents by detergent and water; rub the surface.

APPLICATION

Substrate temperature should be between 15°C to 35°C and moisture content. Relative humidity during application should not be more than 70%. Apply a coat of Epoxy clear / Sealer is ready to use, no thinning required. Once sealer becomes tack free 2-4 hours, apply one coat of SF SL Epoxy. Mix both components Resin and Hardener using slow speed drill mixer for minimum 3 minutes. Pour evenly on the surface and spread to desired thickness. Do not thin it. Workers are advised to use spike shoes to allow the material self-level. To improve the surface texture and appearance, lightly back roll using spiked roller, continue till entrapped air is released.

TECHNICAL INFORMATION

- Coverage
  100-110 sq.ft per Litre
- Application
  Brush / Roller
- Thinner
  No Thinner/Solvent Free
- Drying Time
  2-4 hours between coats at 30°C
- No of Coats
  2-3
- Cleaning
  Clean equipment with Epoxy Thinner
- Thinning
  Solvent Free
- Induction
  2 hours at 30°C

SPREADING RATE

1 COAT
On previously painted surfaces to get the one coat hiding up to 110 sq.ft per liter / per coat

2 COATS
On new surfaces up to 100 sq.ft per liter by two coats
