In case ventilation is insufficient the use of proper respiratory equipment is advised.

APPLICATION

Brush or airless spray (preferable): Airless spray tip 13 thou, 2000 PSI. Not to be applied below 1°C. Mix individual components to uniform consistency, then combine in recommended ratio, allow to stand 15 minutes before use. Thin as required for brush or spray application with recommended thinner. Do not thin separately packed components. Use of thinner other than that specified or recommended may adversely affect the product performance. Mix only that quantity which is supposed to be consumed within the pot life of paint.
